A; Description: catalyzes the proteolytic activation of coagulation factor IX
A; Pathway: blood coagulation intrinsic pathway
C; Superfamily: coagulation factor XI; trypsin homology
C; Keywords: blood coagulation; duplication; glycoprotein; hemophilia C; homodimer; hydro
F; 19-18/Domain: signal sequence *status predicted <SIG>
F; 19-18/Domain: appla repeat <AP1>
F; 19-198/Domain: apple repeat <AP2>
F; 199-198/Domain: apple repeat <AP2>
F; 199-288/Domain: apple repeat <AP2>
F; 199-288/Domain: apple repeat <AP4>
F; 388-632/Product: coagulation factor XIa light chain *status experimental <LCH>
F; 388-632/Product: coagulation factor XIa light chain *status experimental <LCH>
F; 388-638/Domain: trypsin homology <TRK'>

Sequence 8, Application US/10041400A
Patent NO. US20020110895A1
GENERAL INFORMATION:
APPLICANT: Darrow, Andrew
APPLICANT: Andrade-Gordon, Patricia
APPLICANT: Qi, Jenson Encoding the Human Se
TITLE OF INVENTION: DNA Encoding the Human Se
TITLE OF INVENTION: Protease EOS
FILE REFERENCE: ORT 1031
CURRENT APPLICATION UNMEER: US/10/041,400A
CURRENT FILING DATE: 2002-01-08
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ; ORGANISM: Bos taurus
; OTHER INFORMATION: Clone ID: 07-LIB188-011-Q1-E1-B11
